

# Balloon time®

Helium Anytime.™

BalloonTime.com  
BalloonTime@WorthingtonIndustries.com

Balloon Time® helium kits and tanks provide a convenient alternative to purchasing and transporting pre-inflated balloons, giving you the freedom to inflate wherever or whenever the celebration takes place. They're lightweight, easy to use and recyclable once they're empty.

Jumbo 12"  
Helium Tank

Jumbo 12"  
Helium Kit

9.5"  
Helium Tank

9.5"  
Helium Kit

## Kits Include:

Helium/air mixture tank

Foil Balloons

## Maximize

Your Float Time

Fill latex balloons to an egg shape,  
not a light bulb.

## Perfect for Any Occasion

Birthdays

Bridal Showers

Celebrations

Everyday  
Moments

Graduations

At Home

On-the-Go

## How to Inflate

Rotate valve  
4 full turns.

Place balloon on black nozzle;  
hold in place.

Gently press down near end  
of nozzle to release helium.

## Average Float Time

For best results inflate balloons

### 1-2 hours before event.

Altitude, high temperature and humidity will affect balloon performance.

 **9" Latex**  
Average float time  
**5-7 hours**

 **Foil**  
Average float time  
**2-3 days**

## Recycle / Store

Empty Balloon Time tanks are recyclable. For complete instructions on preparing your tank for recycling, visit

[BalloonTime.com/Recycle](http://BalloonTime.com/Recycle) or contact your local solid waste authority.

**Helium tank not empty?** Keep the tank on hand for your next celebration. Store in a cool, dry place.

## FAQ

<b>Is Balloon Time® safe?</b>	Yes, please follow all warnings on the carton and tank. Do not inhale helium or put any part of the tank in your mouth or nose. Keep out of the reach of children and discard broken balloons immediately. Some balloons are made of natural rubber latex, which may cause allergic reactions.
<b>How can I extend the float time of my balloons?</b>	Be sure to inflate your balloons to the proper size and avoid over- or under-filling. Tie a knot in the neck of your balloon for the best closure. If you're attaching a ribbon, tie it between the knot and end of balloon for latex, or below the inflation port for foil. You can also purchase and apply ULTRA HI-FLOAT® product to your latex balloons to help reduce helium seepage through latex, available at most party stores. (HI-FLOAT is not a Balloon Time product.)
<b>Can I refill my Balloon Time tank?</b>	No, the tanks are non-refillable. Attempting to refill can lead to injury or death. Please recycle.
<b>How do I store the tank?</b>	Close the green valve tightly by turning clockwise. Store in a cool, dry place.
<b>Does helium expire?</b>	No, helium does not expire. You must close the valve tightly or helium will leak over time.
